

# MOHAMMAD SMADI

Software Engineering Technician Student | Technology, Gaming & Fitness

---

## PROFILE

Software Engineering Technician student with hands-on academic experience in programming, web development, databases, software design, and technical problem-solving. Interested in technology, gaming systems, and fitness training, with a practical approach to learning and helping others.

## EDUCATION

### Software Engineering Technician - Centennial College, Toronto, Ontario

Current student. Coursework and project work includes web application development, programming, databases, software system design, software testing, and operating systems.

## TECHNICAL & ENGINEERING EXPERIENCE

### Software / Engineering Projects

- Build and troubleshoot programming and web-development assignments using structured, readable code.
- Work with React, JavaScript, HTML, CSS, C# concepts, databases, and software design principles.
- Apply problem-solving and testing skills to identify errors and improve application behavior.

## GAMING & PC EXPERIENCE

### Gaming Technology

- Strong familiarity with PC gaming environments, peripherals, game launchers, online platforms, and common hardware/software troubleshooting.
- Comfortable configuring gaming equipment and diagnosing connectivity, input, and performance issues.
- Interested in competitive gaming and the technology behind gaming systems.

## FITNESS & GYM EXPERIENCE

### Fitness Training

- Practical gym experience with resistance training, exercise selection, workout structure, and training consistency.
- Able to help explain basic exercise technique, gym routines, and general training organization.
- Strong interest in strength training, physique development, and fitness education.

## SKILLS

|             |                                                                        |
|-------------|------------------------------------------------------------------------|
| Development | React • JavaScript • HTML • CSS • Programming fundamentals             |
| Technical   | Troubleshooting • Databases • Software testing • System design         |
| Other       | Gaming technology • Fitness training • Communication • Problem-solving |
